

Pylogen Marketing Internship

The marketing of software-, web- & business development.

Pylogen is running a regular 6-month internship program for marketing students. The program aims to provide a practical environment where students can apply the theory learned at the University, within a controlled environment. The internship can also be used as a work reference after you've completed your studies.

Benefits of the Program:

- Gain practical work experience while studying.
- Learn more about Information and Communication technology, such as software development and web development.
- Learn more about Business Process Streamlining
- Work together in a team or on your own to reach goals.
- Network with other marketers and sales people- and learn from each other.
- Develop good interpersonal relationships
- Work in an informal environment with very creative and innovative people.
- Gain experience - and make commission!

This internship program also offers you the opportunity to earn an extra income! E.g. Earn from R 500 to R 2 000 (possibly more) on the sale of a website. (The more you sell -the more you earn!). While you are involved with the internship program you will also receive commission on all monthly payments.

Commission structure will be explained during training or upon request. Training sessions will commence during the course of March. Training is not included in the 3-month internship period.

If you and a friend work well together and would both like to be part of the Internship program, please attach your Application forms together and motivate your request to work together during the Internship program.

Minimum goals are set to remain within the internship program after 3 months. Applicants who are successful during the first 3 months will be given the opportunity to sign up for a 6-month internship thereafter and possible full employment at the end of the year.

Please fill in an application form for the Internship program, submit it to Dr. Van Zyl at the Business Management department. Contact Philip Penning for more information about the Internship program.

The application form must be submitted on the latest Friday, 6 March 2009.
